Video Interview: Envisioning 6G

Although still in research phase with many uncertainties around it, the development of 6G is already well on its way. Watch the following interview clip to find out how and when our R&D Manager Mika Kiiskilä envisions the roll-out of 6G to occur!

Staying at the forefront of technological innovation is no easy feat – as our recent website article reveals, being an innovative technology partner to the leading telecom companies in the world has required continuous commitment to development as well as close co-operation with the customers. Simply put, technological innovation is deeply rooted in close partnership!
